About Me

T-shaped UX/UI Designer with end-to-end experience, connecting UX Research, information architecture, user flows, wireframes, high-fidelity prototyping and UI Design with front-end implementation. I focus on turning real user problems into intuitive, accessible and consistent digital experiences aligned with product goals.

I hold a degree in Systems Analysis and Development from UNIP and completed the Google UX Design Professional Certificate, strengthening my knowledge of research, problem definition, ideation, prototyping, usability testing and iteration.

My technical background in React, React Native and TypeScript supports close collaboration with developers and reduces friction during design-to-development handoff.

I have experience with Design Systems, structuring components, visual hierarchy and interface consistency, from Figma through implementation. I incorporate generative AI into the design process to accelerate research, ideation and prototyping while maintaining quality, accessibility and real-user validation standards.

I work with UX Research, Usability Testing, Equity, Design Systems, Figma, React, React Native and TypeScript.

I am seeking to contribute to product teams in a strategic and hands-on capacity, helping solve complex problems and continuously improve digital products.

Professional Experience

Jun 2025 – Nov 2025 (Completed)

TI Help — Technical Support System (Capstone Project)

Worked as a UX/UI Designer and Mobile Front-End Developer in a multidisciplinary team of four, leading the end-to-end design process (research, user flows and high-fidelity prototyping) for an integrated technical support ticket management system across mobile, web and desktop.

Implemented the mobile application in React Native, using generative AI tools to accelerate development. The other team members developed the back end, API and database, with academic guidance from professors specializing in Software Architecture, Database Analysis and related fields throughout the project.

Conducted interviews and usability tests with 11 participants (seven classmates from the Systems Analysis and Development program, two students from another class and two Psychology students), as well as supervising professors. Achieved an 85% task completion rate without prior guidance, validating interface clarity. The findings reshaped the product backlog and improved user navigation. The capstone project received a score of 8.5/10 from the evaluation panel.

TI Help Capstone Project

Nov 2025 – Present

Social Media Designer — Freelance for City Councilor

Planned and executed visual communication and content strategies (posts, Reels and visual identity) for political communications, translating public engagement goals into design guidelines and an editorial calendar.

Generated 10K views with a single post and reached 47.7K views in the latest quarter (Mar–Jun 2026), approximately 29% growth compared with 37K views in the previous quarter, according to Instagram Insights. Gained more than 170 new followers, with 96.5% of reach coming organically and only 3.5% from paid ads.

@vereador.elvis

Dec 2022 – Present (Volunteer)

Volunteer — Foursquare Gospel Church

Lead content direction, visual identity and video editing (YouTube thumbnails and social media content) for institutional communications, contributing consistently for more than two years.

Helped grow the channel organically to 250 YouTube subscribers, more than 400 Instagram followers and approximately 3K monthly views, entirely through an organic content strategy.

Projects & Case Studies

Sep 2026 – Nov 2026 (Completed)

KaloBurn | UX/UI Design · Product Design · Mobile-First

Problem: Users struggled to maintain workout consistency and track physical progress, while training, nutrition and monitoring tools remained fragmented.

Action: Led the end-to-end UX/UI process, from qualitative interviews and needs assessment to information architecture, user flows, prototyping and usability testing. Designed adaptive AI-powered workouts, smartwatch integration, progress tracking, meal planning and gamification through a Health Score.

Result: Developed a high-fidelity prototype integrating training, nutrition and fitness tracking. Conducted four usability tests to evaluate key flows and identify refinements before developer handoff.

Jul/2026 – Set/2026 (Finalizado)

DN Jeans | UX Strategy · Landing Page (Product Catalog)

Problem: The traditional shopping experience did not match users' preference for more direct communication.

Action: Conducted user research and redesigned the journey, replacing the e-commerce model with a digital catalog that converts through WhatsApp. Simplified the information architecture and defined the microcopy and calls to action.

Result: Created a more direct explore → choose → purchase journey, reducing navigation complexity and friction in purchase decisions.

Jun/2026 – Jul/2026 (Finalizado)

ImovePro | UX/UI Design · Web/Mobile

Problem: Traditional property search made it difficult for users to discover and compare listings based on different needs.

Action: Designed a responsive UX/UI experience focused on clear property information, intuitive filtering, comparison and streamlined navigation across web and mobile.

Result: Delivered a clearer property discovery experience, helping users evaluate options and move through the journey with greater confidence.

Technical Skills

UX Skills

UX Research · User Interviews · Usability Testing · Information Architecture · User Flows · Wireframing · Prototyping · Design Systems · Usability Heuristics · Accessibility · UI Design

Development

- React com TypeScript, React Native e C#.

Agile methodologies (Scrum, Kanban and TDD).

Tools

Notion · Figma · Canva · Adobe Lightroom · CapCut · Photoshop.
AI tools for productivity, research synthesis, ideation and image generation.

Education & Certifications

Associate Degree in Systems Analysis and Development

UNIP, Brazil. Completed in December 2025.

Google UX Certificate

Google UX Design Professional Certificate. Completed in September 2026.

Scrum Foundation Professional Certification - SPFC

Additional training in UX/UI Design and Front-End Development. Completed in November 2025.

Languages

Portuguese: Native

English: Upper-intermediate to advanced (self-taught)
